

Donation Guidelines

Equipment

IMPORTANT INFORMATION:

If possible, all accessories and manuals should be included with equipment. Most developing countries prefer equipment that is simple and easy to use. Non-electrical tables and equipment are preferred over equipment that is dependent upon electricity to operate. Equipment that requires electricity to operate should function on both 50 and 60 Hz or be easily convertible to different voltage and frequency inputs.

MEDICAL EQUIPMENT NEEDS

- Electrosurgical Unit
 - Monitor, ECG
 - Monitor, Vital Signs
 - Pulse Oximeter
 - EKG Recorder
 - Defib/Monitor
 - Suction Pump
 - Endoscope & Light Source
 - Diagnostic Ultrasound

 - Surgical/Delivery Table
 - Lab Microscope
 - Surgical Microscope
 - Stethoscope
 - Sphygmomanometer
 - Oto/Ophthalmoscope
 - Laryngoscope
-

EQUIPMENT WE *DON'T* ACCEPT

Because FAME only sends clinically and technically appropriate materials to the field, please contact FAME to discuss the equipment you would like to donate. Please appreciate that not all items are practical and appropriate for use in developing countries
